About This Game

Thetaball is an authentic digital sport with challenging, physics-based gameplay and lifelike AI. Each of the game's 256 robotic players is a distinct individual, created by a process of simulated evolution; because the bots have co-evolved within a complex physical environment -- both cooperating with and competing against one another -- their behaviors are diverse, robust, and lifelike. The end result is a game with all the challenge and re-playability of a real-world sport.

In the single-player game, your task is to field a team of robotic athletes in order to advance through a series of progressively more challenging leagues, earning as many coins as you can along the way. You can remotely control any of the bots on your team, or let them play on their own.

In the local-multiplayer game, 2-8 players choose up sides, with AI-controlled bots filling in the empty slots.

About the Engine

Generator is a specialized 2D game engine based on Evolutionary Robotics, a technique for the automated creation of simulated robots. The engine provides a C++ framework for generating populations of such robots and deploying them in a completed game. It also includes a heavily optimized, glitch-free physics module for simulating the environments in which the robots interact and evolve. Thetaball is the first game built on the Generator engine; more are planned.

Some Thetaball Features

- A true physical (not statistical) simulation -- outcomes are determined not by "rolling dice" but by the actual physical interactions between players.
- Lifelike AI -- every bot is a distinct individual with its own unique style of play.
- Extensive single-player game -- earn coins, develop your team, and advance through the leagues.
- Exciting couch multiplayer with up to 8 players -- a great party game!
- Play with a gamepad or mouse.
- Bet on individual matches or buy in to a tournament.
- Slow motion replays.
- Ultra-smooth animation.
- Monitor your coins with a variety of financial reports.
- Dozens of practice drills.
- Physics-based procedural sound.

Title: Thetaball
Genre: Action, Indie, Simulation, Sports
Developer:
Tim Sheehan
Publisher:
Tim Sheehan
Release Date: 31 Jul, 2018

b4d347fde0

Minimum:

OS: Windows 10

Storage: 48 MB available space

English

← DIFFICULTY OPTIONS →

SET ALL OPTIONS    

WEAPON LIMIT    

Adjust how many weapons the survivors will start with

WEATHER IMPACT    

Adjust the frequency of weather changes and the impact of weather effects

ZOMBIE ATTACK RATE    

Adjust how frequently the zombies will try to get inside a location

ZOMBIE COMBAT ABILITY    

Adjust how much damage zombies do to survivors

ZOMBIE DESTRUCTION    

Adjust how much damage zombies do to entrances when they attack

4 / 5

WE MUST SURVIVE!

This is a rather chill game. A cluedo whodunnit!. You only have to move around, and fast forward and rewind time. There are readable notes and diary entries. It all works really well. I thought I knew whodunnit, but in the end the game shocked me and defied my expectations. There are also lots of smaller plots which take place and they all climax at the same time. This is no problem due to the time travel mechanics. The characters are voiced with emotion and theres even some degree of facial expressions going off. The total "real time" in this game add up to about 1 hour, but you'll have to re-play sections over again. You can freeze time and still move around (rain drops suspended in the air!) so you won't miss any action.

The characters almost always have something to do in this game. They don't just walk to a chair after a conversation, and sit, in a looping animation for 30 minutes. There are always characters wandering around, quizzing other guests, because as well as yourself, nearly no one else in the house knows who did the murder! An utter joy of a more casual VR game which is totally worth the full price if you enjoy narrative driven, well written experiences.. It's gameplay, graphics, sounds and pretty much everything in it are frustrating! It is very short and different campaigns are not related to each other, maps are small, some commandos men from previous games are missing too.. As a fan of Commandos series i strongly do NOT recommend this game, which is badly executed add-on of Commandos 2.. I really enjoy this game, (Beside the fact that it's ponies)

Yeah the dialouge could use improvement, but the visal artwork and emerssive music is what I really enjoy about it. The gameplay itself, quite oldschoool 1990's challenging.

The achivement system is a great way for replayabilty as well, trying to find stratigies and ways to complete them.

Overall, it's really awesome!. I'm usually not that opposed to more experimental games, but I do see a lot of them hiding behind that label. And I feel that Copoka might be doing the same thing. Mechanically, it's about a bird flying around a city while collecting things to build its nest. But as you're doing that, you also end up hearing a few conversations about how this place is really a totalitarian state with a rebellion brewing inside it. While I appreciate the idea of a small and insignificant creature, that has nothing to do with these events, being able to listen into them, I can't say that the game actually manages to achieve its goal of evoking empathy for someone you don't know and couldn't care less about. Because I did in fact not really care about the narrative, since it's just too rudimentary and vague to effectively elicit an emotional response from me.

From a technical perspective, the flight mechanics are fun, they'd be suited well if explored some more in a game that was more than a mere collectathon. But the game also struggles mightily to keep a decent framerate, staying between 30 and 45 fps at all times and sometimes even dropping below 30. And that for a game that doesn't boast visuals that would warrant putting such a strain on my not insignificant hardware.

If this hadn't been one of the freebies thrown into each Humble Monthly bundle, I probably wouldn't have picked this one up, as such I can't really recommend it either.. This is a dreadful product. It doesn't run.

Steam seem to think that it's the buyer's job to fix products that are broken out of the box and so will not refund the purchase price.

This game shouldn't be on sale!. I SEEN BETTER ZOMBIE DRIVING GAMES TO SHORT ALL YOU DO IS DRIVE AROUND RUN OVER ZOMIBLE THEY CANT EAT YOU OR NOTHING BASE OF A TIME AND DRIVING. DETAILS ARE OK. I wrote a detailed review for the first Empress of the Deep and I don't feel up to writing another so I'll just quickly list the similarities and differences.

- Number 2 is slightly longer than 1, much more so if you spend time in the bonus area and playing the new ZEM game.
- Graphics are better. In fact, I've played this game more than once simply to view the beautiful scenery.

-
- Puzzles aren't too difficult.
 - More and clearer hidden object areas than the first game.
 - Story is still very cryptic.
 - Still has "Area Cleared" stamped on places where you've completed everything. Such a great feature!

In my opinion, Empress of the Deep 2 is the best of the trilogy. However, as much as I love this game, I still recommend trying to find it on sale because of its short length. Really though, I think this is one of my favorite hidden object games. It's almost as if the developers took some of the lovely places I've dreamed of and placed them in their game.. This surprisingly is very good game,love it.

Gives me flashbacks to flash back in the mid 2000s. Whew boy.. looked promising, but the bobbing towers and wobbly enemy smashing into them, preset resources limit what you can build. I thought I would like this, but its just not... fun.. Not a bad game, basically a text version of the Sims brought down to the basics and a little harder. You can probably finish this game at the "normal" difficulty plus all tutorials and achievements in around 15 hours, tops.

Feels like you could invest your time in other games, gets really repetitive and you basically just click on boxes until the week is done, refresh repeat, add some automations "services" and then lower the amount of clicks.

Would need more content to be a recommended purchase. Get it on sale to kill the time. This VN is short, but I enjoyed every minute of it's lovely and unique story!. Took half an hour to get my truck to the finish on one of the later stages.

The truck ended up exploding and slowly slid sideways across the finish.

I suicided to win again and will continue to do it again. 10/10
